Park University’s School of Business offers an innovative and exciting 4+1 program for your Master in Business Administration (MBA), Master in Healthcare Administration (MHA), and Master of Public Administration (MPA).

The 4+1 program allows undergraduate students in business (all majors) with at least 60 undergraduate credit hours (GPA of 3.0 or higher needed) to take graduate coursework in the MBA, MHA, or MPA program, fulfilling not only their undergraduate degree requirements, but also counting toward the completion of their Master’s degree.

This accelerated degree program will reduce the time necessary to complete your chosen graduate degree from two years to as little as one year following the completion of the undergraduate degree. Additionally you will have the benefit of saving a load of money.

**4+1 admission requirements:**

- GPA of 3.0 or higher needed
- At least 60 undergraduate credit hours

**How it works**

Qualified students may apply to take up to 12 credit hours of graduate courses towards the graduate degree. They will take the selected courses during their senior year and must be enrolled in at least 12 semester credit hours combined of undergraduate and graduate classes each semester.

For more information contact your student advisor.
