The 4+1 program allows undergraduate students in business (all majors) with at least 60 undergraduate credit hours and a GPA of 3.0 or higher to take graduate coursework in the MBA program, fulfilling not only their undergraduate degree requirements, but also counting toward the completion of their Master’s degree. Qualified students may take up to 12 credit hours from the MBA curriculum, which will reduce the time necessary to complete your chosen graduate degree from two years to as little as one year following the completion of the undergraduate degree. Additionally you will have the benefit of saving a load of money.

**How it works**

**Enroll in the Graduate Course**
